When the package arrived yesterday, I realized that the courier did not have any installation CD. Last time dupt guys set my router and gave me id and password. I do not know how to configure this without cd. Does anyone here tell me how to do it without the CD needed? Thanks in advance! Sam 1 Answer Belkin Router 3 years Reply Link There is no need to get worried if you lost belkin router CD as other ways, you can also install belkin router. Let's see how to install belkin router without CD using Manual setup - First of all, disconnect your internet modem and Belkin router from the power source. Now, take an ethernet cable and connect your Belkin router to an Internet modem. Connect the Ethernet cable to the Modem Ethernet port and the Internet port of the Belkin router. You must reconnect the Internet modem to the power source. After connecting the modem to the power supply, connect the Belkin router to the power source. Take another Ethernet cable to connect your COMPUTER directly to the Belkin router. You can connect an Ethernet cable to any port marked as Ethernet. In Next, start Internet Explorer, and then type 192.168.2.1 in the browser address bar, and then press the Enter button. You are now prompted to the Belkin Router setup page, where you must enter sign-in credentials. After you enter the user name hit Login, which appears in the upper-right corner (Do not enter password field). You are now redirected to the Belkin Router setup page. On this page, go to the Internet WAN section, locate Connection type and tap it. Choosing your internet connection hit Quito. Although Dynamic is the common type of connection that is used by the ISP. If you experience any uncertain, uncertain, contact your ISP for more information. Enter the connection information provided by your ISP. Then apply the changes by clicking the Save button. Finally, check your Internet connection status and confirm that it appears as Connected. Now your Belkin router setup without a CD successfully connected to the Internet. If you have any problems applying the above procedure, then drop the message here, I feel glad to help you. If you need professional help belkin router then do not hesitate to contact Belkin router. Our services are rated 4.6 out of 5 based on 266 Google ratings, and in addition, customers can perform two ways when setting up a Belkin router. Using the Setup CD that was supplied with the router Using the Router's built-in Web Setup page This article will specify how to set up your router using a setup CD. You can also set up a router by using the Web Setup page. Click here to learn how. QUICK TIP: The default user name and password for the Belkin router are located at the bottom of the device. NOTE: This article also applies to wireless devices, such as laptops. To set up a Belkin router using a setup CD, you must follow the following procedures: NOTE: The images may vary depending on the type of computer and router model you are using. Check the Internet connection step 1: Connect your computer to your modem with an Ethernet cable. Step 2: Check that your computer gets an Internet connection by connecting to the site. Connect devices together Before connecting the modem to the router, first disconnect the modem and router from the power source. Use an Ethernet cable to connect your modem to your router's WAN or Internet port. Step 2: Connect the modem and router to the power source. Connect your computer to any LAN or Ethernet ports on any router. If you're using a wireless computer, you'll need to temporarily connect it with an Ethernet cable. The default network name (SSID) and password are required to connect wireless devices to the router. This information can be verified by viewing the Belkin router label. Newer Belkin routers, SSID and password can be found at the bottom of the router. After receiving the default network name and password, you are now ready to install your Belkin router. Insert the Belkin router setup CD into your computer's CD-ROM drive. If the CD doesn't open automatically, go to the CD-ROM drive and double-click the Belkin Setup CD icon. Step 2: Click the Setup icon in the CD menu. When prompted, type the default network name (SSID) and password on the router label, and then click Next. Until additional software is installed, a progress screen will appear. This may for a few minutes. When you're done, a success notice will show that you are connected to the Internet through your new Belkin Router. Router. Router.
